## PROGRAM HIGHLIGHTS

The Digital ThinkTank is an intensive workshop dedicated to exploring and understanding the NABH (National Accreditation Board for Hospitals & Healthcare Providers) Digital Health Standards. This program aims to equip healthcare professionals and administrators with comprehensive insights into the current digital health landscape, compliance requirements, and practical applications of these standards in healthcare settings.

### Objectives

To familiarise participants with NABH's digital health standards and their significance | To provide actionable guidance on implementing digital health solutions in compliance with NABH regulations | To encourage collaborative discussions and sharing of best practices among peers in the healthcare industry | To foster innovation and technological advancement in healthcare through digital means.

### Program Structure

An overview of NABH standards and the digital transformation of healthcare | Workshops focusing on real-life case studies, compliance strategies, and assessments | Experts and industry leaders discussing challenges and opportunities in digital healthcare | Time allocated for participants to engage with peers, share experiences, and build professional networks.
